

### Remarks

The Examiner has rejected claims 1 through 3 under 35 U.S.C. 102(e) as being anticipated by Cooper (US Patent Application No. 2002/0067407).

The applicant has amended claims 1 and 2. Claim 3 depends from claims 1 and 2. The applicant respectfully contends that Cooper teaches a universal docking system (UDS) 100. The cable assembly of amended claim 1 couples a dental video camera to a monitor through a circuit module. The applicant respectfully contends that Cooper teaches an x-ray film scanner 106 that enables a standard bite wing film image to be converted to a video signal and displayed on the video monitor 112, or digitized via a computer frame grabber board. The cable assembly of amended claim 2 includes a frame grabber interface circuit that electrically couples the dental camera to a video monitor.

The applicant now believes that his application is in condition for allowance and requests a speedy action to that end.

Date: November 18, 2005

Respectfully submitted.
